

# ANTI-CORRUPTION STUDIES

THE MASTER'S PROGRAM

**COURSE**

**ACADEMIC INTEGRITY**

2023/24

**Instructor:** PD Dr. Angelos Giannakopoulos

1st Trimester (September-December 2023)

## Course Description and Contents:

The course is designed to increase student knowledge of academic integrity, university rules relating to academic conduct, and the identification and consequences of academic misconduct. Internationally, academic integrity is defined as a commitment to five fundamental values: honesty, trust, fairness, respect, and responsibility. These five values as well as the courage to act on them even in the face of adversity, are fundamental to academia and scientific life in general. The course uses a range of different sources and materials in order to make students familiar with these values. Besides and as much as the online teaching conditions allow this, it establishes an interactive learning process by applying a more active role of students in teaching. All sessions and discussion items will be based on detailed Powerpoint Presentations prepared by the instructor.

## Frame Course Aims

### The course aims to:

- ▷ provide a learning environment for all students, free of bias
- ▷ develop appreciation of a range of single thematic course elements
- ▷ stimulate students' active involvement, logical argumentation and communicative capacity
- ▷ advance the ability of students to work independently on the basis of text accounts and other seminar materials provided
- ▷ develop the ability of students to engage effectively in their work by applying scientific oral and writing standards

# SCHEDULE

Nº	Topic	Date	Time	Type of class
1.	CLASS 1: 1. Writing with academic integrity 2. Getting a good mark 3. Finding items on your reading list	September 5 <sup>th</sup> , 2023		Lecture workshop

3.	CLASS 3: 1. How to paraphrase 2. Does it need a citation 3. Writing brief and full citations	September 13 <sup>th</sup> , 2023		Lecture
4.	CLASS 4: 1. Citing less common materials 2. Avoiding unintentional plagiarism	September 14 <sup>th</sup> , 2023		Workshop
5.	CLASS 5: 1. Where to find bibliographic details 2. Compiling a bibliography	September 21 <sup>st</sup> , 2023		Lecture Workshop
6.	CLASS 6: 1. Using the internet for research	October 3 <sup>rd</sup> , 2023		Lecture Workshop
7.	CLASS 7: 1. Conclusions and Follow-up	October 5 <sup>th</sup> , 2023		Lecture Workshop

## Course website

Program, announcements and study materials will be on the website of ACREC: <https://acrec.org.ua/>

## Course Requirements:

Completing basic text readings prior to each class, attending regularly and participating actively during the course are highly required. It's important that you attend and participate in class; our class meets only once a week, so missing one class represents a substantial portion of the semester. If there are special circumstances requiring you to be out of class, please email me before class. You should login on time.

There will be **6 homeworks (essays)** during the trimester. The texts on which the homeworks-essays will be based will be easily understandable texts to all students regardless of their academic background. **The homeworks will account for 40% of the overall grading.**

A final exam will take place after the end of the course. The final exam will consist of four different questions which have to be answered by the students. According to the current state of affairs regarding the pandemic the final exam is supposed to be a take home and open book exam. **The final exam will account for 60% of the overall grading.**
